

1. Authorization for School Personnel to Administer Medication to Students

The Director of Pupil Services or the Health Room designee shall designate, the names of appropriate school personnel who will have the authority to administer medications to students in a manner consistent with all relevant policies and procedures.

- a. Any registered nurse serving the District may administer any medication by any means permitted within the scope of the individual's nursing license.
- b. Other school personnel may be designated to administer medication via ingestion, an inhaler, and/or an epinephrine auto-injector, provided that the individual has completed any applicable state-mandated training. A registered nurse serving the school or other health care professional shall assist the principal in ensuring that such personnel receive any additional instruction, support and supervision as may be appropriate. A principal or registered nurse serving the schools, in certain cases, may specifically limit the personnel who will have authority to administer particular medication to a particular student.
- c. No school personnel, other than a health care professional, shall be involuntarily required to administer medication to students by any means other than ingestion. However, a registered nurse serving the school must decline to perform any medical act or service which the nurse is not competent to perform due to lack of education, training or experience, or when the nurse believes that administering the medication could cause harm to the student.
- d. If a student requires assistance from school personnel in the administration of any medication or through any means that constitutes the delegation of a nursing act, or any other specialized health care services that constitutes the delegation of a nursing act, it shall be the responsibility of a registered nurse serving the school to: (1) delegate such tasks to appropriate school personnel, with proper authorization from the Director of Pupil Services; and (2) ensure that school personnel engaging in such activities receive appropriate training, instruction and supervision.
- e. All school personnel authorized to administer medication to students shall receive a copy of the District's policy on administering medication to students, and a copy of these procedures.

2. Identification of Students Requiring Administration of Medication

Students requiring medication to be administered by school personnel shall be identified by their parents/guardians to the registered nurse, or Health Room designee serving the school. Adult students may self-identify their needs. Requests shall require the completion of applicable District medication permission forms.

3. Administration of Prescription Medication

Authorized school personnel will administer a prescription drug to a student only if all of the following conditions are met:

- a. The school must receive a written consent from the student's parent/guardian, or from an adult student, for designated school personnel to administer medication to the student in the dosage prescribed by the health care practitioner. "Health care practitioner" is defined as any physician, dentist, optometrist, physician assistant, advanced practice nurse prescriber or podiatrist.
- b. The school must receive written instructions from the student's health care practitioner regarding the administration of the prescribed medication. These instructions shall include the medication name,

dose, route, frequency, time/conditions, duration and the health care practitioner's name and contact information. Where applicable or where requested by school personnel, such instructions may also include relevant precautions, information about possible reactions and/or interventions, and the circumstances under which the health care practitioner should be contacted.

- c. The prescription medication shall be supplied to the school in the original pharmacy-labeled package that specifies the name of the student, the name of the prescriber, the name of the prescription drug, the dose, the effective date, and the directions in a legible format.
- d. If the prescription medication is required to be injected into the student, inhaled by the student, rectally administered to the student, or administered into a nasogastric tube, a gastrostomy tube or a jejunostomy tube, the school personnel designated to administer the medication to the student shall complete any DPI-approved training required for administering medication through that particular means prior to administering the medication to the student. Such training is not required for registered nurses or other health care professionals.

4. Administration of Glucagon or Epinephrine by School Personnel in Emergency Situations

School personnel who have been authorized to do so in writing and who have received applicable state-mandated training may administer glucagon or epinephrine to a student in an emergency situation if all of the requirements for the administration of a prescription medication, as defined in the previous section, have been met, or under the following additional special circumstances:

- a. With respect to epinephrine, such school personnel may use an epinephrine auto-injector to administer epinephrine to any student who appears to be experiencing a severe allergic reaction if, as soon as practicable, a person reports the allergic reaction by dialing "911" or, in an area in which the telephone number "911" is not available, the telephone number for an emergency medical service provider.
- b. With respect to glucagon, such school personnel may administer glucagon to any student who the school bus driver, employee, or volunteer knows is diabetic and who appears to be experiencing a severe low blood sugar event with altered consciousness if, as soon as practicable, a person reports the event by dialing "911" or, in an area in which the telephone number "911" is not available, the telephone number for an emergency medical service provider.

5. Administration of Nonprescription (Over-the-Counter) Medication

Authorized school personnel will administer nonprescription drug products to a student only if all of the following conditions are met:

- a. The parent/guardian shall provide the appropriate school personnel with written consent and instructions.
- b. If the nonprescription medication is supplied by the student's parent/guardian, it must be supplied in the original manufacturer's package that lists the ingredients and recommended therapeutic dose in a legible format. School personnel may administer nonprescription medication to a student in a dosage other than the recommended therapeutic dose only if the request to do so is accompanied by the written approval of the student's health care practitioner.
- c. If the nonprescription medication is required to be injected into the student, inhaled by the student, rectally administered to the student, or administered into a nasogastric tube, a gastrostomy tube or a jejunostomy tube, the school personnel designated to administer the nonprescription medication to the student must complete any DPI-approved training that is

required for administering medication through that particular means prior to administering the medication to the student. Such training is not required for registered nurses or other health care professionals.

6. Student Possession and Use of Inhalers and Epinephrine Auto-Injectors

- a. An asthmatic student may possess (carry) and use a metered dose inhaler or dry powder inhaler while in school or at a school-sponsored activity under the supervision of a school authority if all of the following conditions are met:
 - the student uses the inhaler before exercise to prevent the onset of asthmatic symptoms or uses the inhaler to alleviate symptoms;
 - the student has the written approval of the student’s physician and, if the student is a minor, the written approval of the student’s parent/guardian; and
 - the written approval(s) are on file in the school records.
- b. A student may possess (carry) and use an epinephrine auto-injector (e.g., Epipen®) if all of the following conditions are met:
 - the student uses the epinephrine auto-injector to prevent the onset or alleviate the symptoms of an emergency situation;
 - the student has the written approval of the student’s physician and, if the student is a minor, written approval of the student’s parent/guardian; and
 - the written approval(s) are on file in the school records.

When providing the required approvals to Director of Pupil Services’ for students to possess and use their inhalers or epinephrine auto-injectors, parents/guardians and physicians should consider the student's knowledge of the medication and ability to use the inhaler or epinephrine independently. If the physician or parent/guardian determines that it is appropriate for the student to have assistance from school personnel in administering the inhaler or epinephrine auto-injector medication in any emergency or non-emergency situations, the medication must be administered in accordance with procedures outlined above for the administration of prescription medication.

7. Medication Storage and Disposal

- a. All prescription and nonprescription student medication in the District’s possession shall be kept in a safe and secure location. Medication will be stored to maintain quality in accordance with the manufacturer’s or health care practitioner’s storage instructions. Medication which needs to be accessible to the student will be stored in an appropriate location per student need.
- b. For field trips and other co-curricular or extracurricular activities held off school premises, student medication will be stored in a secure location determined appropriate by the activity supervisor, keeping in mind the manufacturer’s or health care practitioner’s storage instructions.
- c. Parents/guardians will be asked to pick up any unused portions of prescription and non-prescription medications within five days after completion of the school year or when the student’s medications have been discontinued. Unused medications will not be sent home with students.
- d. Student medications that have reached an expiration date or that have not been picked up by the student’s parent/guardian will be disposed of in a safe and proper manner in accordance with DPI’s [Guidelines for Disposal of Medications in the Schools](#).

8. Recordkeeping

- a. The Director of Pupil Services is responsible for maintaining written records of the school personnel who have been authorized to administer medication to students and of documentation of staff completion of all required training courses, including the dates on which such training occurred.
- b. Upon receipt of a student's medication at the school, school personnel will document the date of receipt, the type of medication, and verify the amount of medication supplied to the school. The person receiving the medication shall ensure that the student's name is affixed to the package of any nonprescription drug product.
- c. The written consents and instructions from the student's parent/guardian and from the health care practitioner, the medication supply receipt documentation, and the staff training documentation required above will be kept on file in the school. The registered nurse, or Health Room designee serving the school will review the medication administration instructions received from the health care practitioner and/or parent/guardian prior to school personnel administering medications to help ensure the safety of students. In addition, a registered nurse serving the school will review the written instructions from the student's parent/guardian annually or more often if changes in medication dosage occur.
- d. School personnel designated to administer medication to students, whether at school or during cocurricular or extracurricular activities, shall do the following:
 - Record each dose of prescription or nonprescription medication administered to a student on the medication administration log, including the date and time given. If the medication is not administered to the student as scheduled, the reason shall be noted on the log (e.g., student was absent from school, the student refused to take the medication, lack of supply of the medication from the student's parent/guardian).
 - Any medication administration that deviates from the instructions of the health care practitioner and parent/guardian (medication administration error) shall be documented on the medication administration log. Errors include, but are limited to, failure to administer a medication: to the correct student; within appropriate time frames; in the correct dosage; via the correct route, and/or in accordance with accepted practice. An incident report should be completed and submitted to the registered nurse serving the school. The student's parent/guardian and prescribing health care practitioner (if applicable) should also be notified of the incident.

The above documentation shall occur immediately after the medication is administered to the student to assure accuracy and safety.

- e. School personnel shall maintain the confidentiality of student health and medication administration-related records in accordance with applicable state and federal laws and regulations and the District's student records policy and procedures.
